

Why

While digitalization shows its effects in all areas of life, education is also transforming with technology. Educational institutions that put digitalization at the forefront of their priorities enable them to increase education quality. When the teacher transforms from being a 'teacher' to being a 'guide', inspiration and practical experiences need to be designed for teachers. In particular, the chaotic environment in education by the COVID-19 pandemic has laid a more indispensable ground for the digitalization of education. This is exactly why we decided to write the "FCL" project on "Digitalization in Education". We have decided to carry out an Erasmus + project on "Digitalization in Education" in line with the roadmap determined within the scope of EU 2021 targets, which is included in our institutions' strategic plan. The project, addressed to teachers of local schools, stakeholders, universities, families and students, involves six partner Institutions from six European countries: schools and Educational and training organizations.

OBJECTIVES

The main objectives are to fill the digital competence gap of the participants, to provide them with digital tools and make it easier to develop or update their digital competencies, to develop communication and cooperation skills with EU institutions. The practical knowledge gained through this project directly covers digital tools. The project recognizes the importance of promoting partners' 21st century skills, technological skills, critical thinking skills, teamwork skills, and international awareness of teachers and students.

We want teachers and students to be more involved in digital education, make a more conscious and positive contribution to digitalization, and realize our objectives that contribute more use of technology in education at the end of the project.

OUR CONSORTIUM COORDINATOR:

Publiczna Szkoła Podstawowa Nr 4 z klasami sportowymi im. Ireny Szewinskiej w Pultusku, Poland

PARTNERS:

Tokat Milli Piyango Ihyia Balak Fen Lisesi, Tokat, Turkey

18 Comprehensive school William Gladstone, Sofia, Bulgaria

Asociatia Edulifelong, Târgu Jiu, Romania

Military Academy "General Mihailo Apostolski" - Skopje, an associate member of the University "Goce Delcev" - Stip, Republic of North Macedonia

Istituto Comprensivo Statale Ignazio Buttitta, Bagheria, Italy

RESULTS

The intellectual output, the Guide for Future Classroom, aims to bring the methodology and tool developed in this project closer to all schools that can access the project languages, by step-by-step guide for the implementation and creation of the Future Classroom.

Tangible results: e-magazine (FCL DIGITAL), an e-book, a website with all materials revealing the works of the project, project logo and posters, a virtual exhibition with artsteps, promotional poster, videos and brochures, presentations, teachers wakalette platform, feedback on activities (Zumpad, videos), Twinspace page, eTwinning and European QL's, learning diaries, hands-on activities, interactive lessons, seminars, start-up and evaluation surveys.

Intangible results: the communication on digitalization, the necessary training for the digitalization division of the personnel working in partner institutions, the transfer of education and training techniques, the arrangement of the necessary knowledge of the educational organization arrangements to be made in order to increase digitalization in schools.
